Product Specification

The ARB Cargo Gear bag range provides outstanding protection against the elements for any gear being stored on an expedition vehicle. Two new bags have been developed specifically for storage and transit of the new ARB SkyDome Swags.

Like the large Storm Bag, these bags feature molded rubber carry handles on either end along with a removable shoulder strap. Unique to the swag bags are four adjustable tie down straps integrated into the bag to allow it to be secured to a roof rack without the need for additional straps.

Features:

- Outer shell made from tough, Oxford weave PU coated fabric and rubber paneling
- All seams are heat sealed and taped to ensure storm proofing
- Roll up top closure with 'Sure Grip' buckles to create water resistant seal
- Removable body curve shoulder strap
- Grab handles on either end of bag

Dimensions:

- Single: 39.3" long x 17.7" diameter
- Double: 59" long x 17.7" diameter

The bags are storm proof. They are not waterproof if fully submerged in water. It is therefore not recommended they be used for carry electronic equipment when stored outside the vehicle. The Swag Bag does not have a rigid floor insert like other Cargo Gear bags and relies on the swag to maintain its shape and seal.

| Part Numbers | Description | List Price |
