May 2018

Description:

Old Man Emu BP-51 Suspension Kit

Application:

Toyota Tundra 2007-On

Part No. & Barcode:

Refer to Table

Price:

MSRP: \$3622.00

Availability Date:

June 2018

Product Specification

ARB 4x4 Accessories is proud to announce the BP-51 suspension kit for 2007-on Tundra applications.

Bring race technology to your adventures with OME's BP-51 Suspension kit, featuring revolutionary patent-pending technology developed to deliver unparalleled on and off-road performance.

These bolt-on, big bore, position sensitive internal bypass shock absorbers have been developed and tested to provide exceptional ride comfort around town with significant amounts of end-zone damping for exceptional chassis control and handling off road.

BP-51 shock absorbers provide greater levels of damping at each end of the stroke based on position and velocity of the piston. This provides a comfortable and compliant ride during normal driving, improved control over challenging terrain and prevents harsh topping/bottoming out through bumpy roads. Damping performance is easily adjustable across a wide range in both rebound and compression, allowing the driver to customize the vehicle's ride performance for road conditions, vehicle load scenarios and personal preference.

The body, reservoir and components are all made from aircraft grade (6061 T6) aluminum, with a type 3, 40 micron hard anodized finish, ensuring exceptional heat dissipation and resistance to corrosion and stone damage.

Designed, developed, tested and manufactured entirely in-house by ARB's team of Old Man Emu engineers to guarantee the highest possible quality, all BP-51 shock absorbers come with a 3-year/37,000 mile warranty.

Kit Components

Kit Number	Description	Component Part #	Barcode	Quantity	MSRP
OMETUN57BP51	BP-51 2" Tundra Medium Kit		9332018054685	1	\$3622.00
	BP-51 Coil Over- Right	BP5190010R	9332018054180	1	\$800.00
