FOR IMMEDIATE RELEASE

Hummer H3 ***ARB Deluxe Combination Winch Bumper***

Seattle, May 28/ ARB 4x4 Accessories/ Due to the ever growing popularity and recent release in Australia, ARB 4x4 Accessories is proud to announce the release of the newest accessory in the Hummer H3 ARB product line up, the ARB Deluxe Winch Bumper.

Considering ARB's twenty-year history manufacturing both original and after market accessories for vehicles around the world, you can be sure to expect a customized mounting system and sleek yet, functional winch compatible bumper system specifically engineered to enhance the look and operation of your H3.

Constructed from premium sheet steel with a tapered wing design, this bumper has been crafted for optimum strength and improved approach angles. ARB's unique airbag compatible mounting system ensures both occupant and vehicle safety. A hard wearing powder coat finish completes the look of this stylish new bumper.

As with all ARB Bull Bar Bumpers, the utmost attention to detail has resulted in a variety of built-in features including recessed indicators, optional recessed fog lamps, Warn Winch compatibility, Hi-Lift jacking points, driving light provisions, twin CB antenna mounting positions and the option to reuse the factory tow shackle recovery points.

ARB will release two bumpers, one to suit models with factory installed flares, and one that will accommodate models without the factory installed flares. With an estimated arrival date of late June for the first batch of bumpers to fit models with flares, ARB has opened the doors for pre orders. The current ETA for the bumper to fit models without flares is Summer 2008.

In addition to the Winch Bumpers, a rear bumper, roof rack, snorkel and Old Man Emu suspension system are currently being developed.
