Description:

ARB Rock Sliders

Application:

Jeep Wrangler JL 4-Door

Part No. & UPC:

4450240 - 9332018059833

Fitting:

1 Hour

Pricing:

List: \$800.00

Availability Date:

June 1st, 2019

Product Specification

Combining functionality, strength, protection and a visually unique design, ARB has developed an ARB style of Rock Slider, not previously available for the Jeep platform.

ARB Rock Sliders to suit the Jeep Wrangler JL 4-door are made up of both the slider assembly and a lower body mount to spread the load and protect the vulnerable lower-rocker area of the JL when used off road. (Note, due to slight differences in flare design between the Sport model and the Rubicon, there is reduced clearance between the JL Sport flare and the rock slider.)

The multi-folded slider utilizes the chassis-mounted body mounts to spread the load along the length of the vehicle rocker and not restrict ramp-over angle. The sliders are manufactured from multi-folded 4mm, laser-cut, pulse welded-sheet steel. The multi-folded sheet steel provides strength without the need for thicker material to keep weight to a minimum. The profile of the slider against the body is curved to match the vehicle shape.

To provide additional support, a rocker plate is fitted with M6 nutserts and M6 button-head zinc-plated Torx bolts. The plate is manufactured from 3mm laser-cut and folded-sheet steel and features a laser-cut ARB logo at the front of the rocker plate.

To complement the ARB JL protection equipment range, the Rock Sliders are finished in Integrit-textured black powder coat.

Protection and Styling Characteristics:

- Vehicle-specific design to suit the Jeep Wrangler JL 4-door
- Durable steel construction for maximum protection
- Two-piece design of rocker mount and slider assemblies
- Slider section manufactured from 4mm laser-cut, multi-folded and pulse welded-sheet steel
- Slider section mounts to chassis-mounted body mounts
- Mounts to vehicle sill, manufactured from 3mm laser-cut and folded sheet-steel
- Rocker panels mount to vehicle with M6-nutserts and M6 button-head Torx bolts
- Approximate weight of the Rock Sliders: 108lbs (pair)
- Shipping dimensions: 84" x 22" x 11"
- Approximate shipping weight: 111lbs
- Finished in Integrit textured-black powder coat. (Integrit not suitable for color matching.)
